THERE ARE FREIGHT COMPANIES AND THEN THERE'S YRCW

From the time we began traveling the roads more than 90 years ago, we have used a combination of extraordinary service, technology and good old fashioned hard work to evolve into the company we are today — one of the largest less-than-truckload (LTL) carriers in North America with ~32,000 employees, driving more than 940 million miles a year and generating \$4.7 billion in annual revenue

YRC Worldwide

YRCW provides services under a portfolio of four operating companies

Collectively, we have approximately 20 - 25% of the public carrier market by tonnage. We provide the broadest coverage and more service capability throughout North America than any competitor. To put it simply, customers tell us where they want their freight to go and when it needs to be there, and we take it there; we carry the economy

We've got every corner of North America covered

(And the maps to prove it)

North American Coverage

YRC Freight serves manufacturing, wholesale, retail and government customers throughout North America. When customers need longer-haul LTL shipping solutions, YRC Freight is the expert

For next-day and time-sensitive services, we have three distinct regional carriers: Holland, Reddaway and New Penn. All three brands are well-established in their respective regions

YRC Freight	Metric
FY 2016 Revenue	\$3.0 billion
FY 2016 Adj. EBITDA	\$140 million
# of Customers	~125,000
# of Terminals	260
Average Length of Haul	1,300 miles
Average Weight	1,200 lbs
Average Transit	3-4 days

YRC Regional	Metric
FY 2016 Revenue	\$1.7 billion
FY 2016 Adj. EBITDA	\$157 million
# of Customers	~150,000
# of Terminals	127
Average Length of Haul	400 miles
Average Weight	1,500 lbs
Average Transit	> 90% in 2 days or less

Networks built for the future

YRC Freight, Holland, Reddaway and New Penn, provide service to more than 250,000 customers in all 50 states, Puerto Rico, Canada and Mexico. Plus, with extensive networks already in place and spanning North America, we are well-positioned to offer LTL services to an even greater number of future customers

APPENDIX

Multi-Employer Pension Plans Contingent Liability

Employees covered by collective bargaining agreements

Required contributions anticipated to be an average of \$1.85^(a) per hour in 2017

- 2017 cash contributions to be approximately \$89 million^(a)
- Expense included in EBITDA

Contributions are made to 32 multi-employer pension plans with various levels of underfunding

- Pension plans are managed by independent trustees

If the Company were to withdraw from or there was a termination of all of the multi-employer pension plans, the Company's portion of the contingent liability would be an estimated \$10 billion

Cash Contributions to Multi-Employer Pension Plans

However.....YRC Worldwide has, and expects to continue, making its required contractual contributions to the multi-employer pension plans thus SIGNIFICANTLY minimizing the potential of any material contingent liability becoming due

Additionally, to our knowledge, there are no regulations that would change our average per hour contribution for the remaining term of the Memorandum of Understanding (MOU) as that is contractually agreed to by and between the Company and the individual funds nor are we aware of any regulations that would materially change the status or amount of our contingent liability. As long as we continue to pay what is contractually agreed to, there should be no issue

(a) The estimated contribution amount is subject to potential increases under the 2014 MOU Extension Agreement if the Company's health and welfare contributions made to maintain the current level of health and welfare benefits are less than the health and welfare contribution amounts already negotiated.

Single-Employer Pension Plans

Certain employees not covered by collective bargaining agreements

Plans closed to new participants effective January 1, 2004 with benefit accrual for active employees frozen effective July 1, 2008

Future funding requirements primarily driven by benefits paid, actuarial gains and losses and company contributions

Long-term strategy is to reduce the risk of the underfunded plans

On average, the single-employer pension expense from 2014 – 2016 was approximately \$21 million, excluding the expense recognition of settlements from lump sum payouts in 2015

Cash Contributions to Single-Employer Pension Plans

(a) Reflects a \$12.2 million contribution due in January 2017 that was paid in December 2016
